

TECHNICAL SKILLS

PHP
Laravel Framework
MySQL Database
JavaScript (ES6+)
jQuery & Ajax
HTML5
CSS3
Bootstrap CSS
Git & GitHub
REST APIs
XAMPP Server

SOFT SKILLS

Problem Solving
Team Collaboration
Communication
Time Management
Adaptability

EDUCATION

Redeemer's University
B.Sc. Computer Science
[Graduated — 2024](#)

CERTIFICATIONS

Software Development Certificate
[Moat Academy](#)
3-Month Intensive Programme

PROFESSIONAL SUMMARY

I'm a result driven Full Stack Web Developer with a B.Sc. in Computer Science from Redeemer's University (2024) and a professional Full Stack certification from Moat Academy. Skilled in building scalable, responsive web applications using PHP, Laravel, MySQL, JavaScript, Html and Bootstrap. Adept at designing clean backend architectures and intuitive frontend interfaces. Currently seeking a full-time engineering role where I can contribute high-quality code to a collaborative, growth-focused team.

EXPERIENCE

Software Development Bootcamp Trainee

2026 · 3 Months

[Moat Academy](#)

- Achieved hands-on proficiency in full-stack web development using HTML, CSS, JavaScript, and PHP by completing an intensive, structured software engineering curriculum.
- Accomplished the design and delivery of functional web projects using modern development tools by adhering to industry best practices throughout each sprint.
- Earned a certificate of completion in Software Development by successfully meeting all programme assessments and project requirements.

PROJECTS

Campus Find

[Tech stack used, Html . Css . Bootstrap . Ajax . JQuery . MySQL . PHP]

- Designed and implemented a full-stack lost-and-found platform using PHP and MySQL, enabling students to report, browse, and claim found items through a multi-role system for students and administrators.
- Utilized PHP PDO with prepared statements to structure all database interactions, improving data integrity and protecting against SQL injection across multiple relational tables.
- Structured the backend architecture using an OOP class-based system with session-based role authentication, secure password hashing, and a real-time AJAX email availability check powered by jQuery.

Connect Pro

[Tech stack used, Html . Css . Bootstrap . JavaScript . JSON . Ajax . PHP . MySQL]

- Built and deployed a dedicated Provider Dashboard using PHP, ensuring providers have a separate interface from clients after login.
- Developed provider search and filtering functionality using PHP and MySQL, enabling clients to find services by category or keyword.
- Created booking management system with status tracking using PHP and PDO.

ACHIEVEMENTS

- Built my first full-stack web application.
- Designed and implemented authentication systems for both student and administrator.
- Developed a relational database using MySQL.
- Implemented CRUD operations with PHP.
